Silvia Nencini is an Italian interior designer with a passion for the art of wall decoration. She studied architecture in Florence and obtained a Master's degree in Design. Since 2018, Silvia has been based in Paris, where she creates wall decorations for both private individuals and businesses. Silvia attaches great importance to working closely with her customers. She takes the time to listen carefully, to understand their tastes, their aspirations and the atmosphere they want to create in their space. This enables it to design personalised wall decorations that perfectly reflect the identity and preferences of its customers. Whether through abstract motifs, enchanting landscapes or graphic compositions, it's always possible to bring walls to life. Combining artistic vision with architectural expertise, she creates unique and captivating atmospheres.

Golden Dawn at the Château

Château privé in Dordogne

Immersed in a real fairy tale in the breakfast room of a castle in the heart of the Dordogne. Every detail has been carefully thought out with the architect T. Smolenschi to bring this unique room to life. Touches of gilding add a touch of sparkle and elegance, creating a luxurious, refined atmosphere.

Mediterranean

Olive green and white camelia

In this project, nature blends harmoniously with the customer's passion for olive green. The aim was clear: to create a Mediterranean landscape in her bedroom. Ideas emerged, turning into sketches, then photomontages, until the concrete outline of the personalised space took shape. This project goes far beyond simple decorative elements. It embodies the customer's history and personality, offering her a space where she can recharge her batteries and find herself again. Every detail, every colour, every texture has been carefully selected to create an atmosphere entirely dedicated to her comfort and well-being.

Meeting Flowers

Medical office in Paris

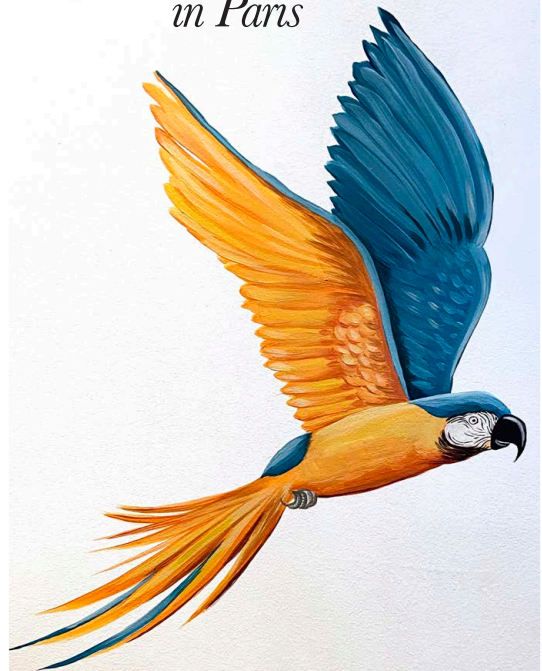

The hummingbird dance

On a sage green background, pale pink, touches of golden leaf and shades of brown and ochre blend harmoniously

A delicate mural adorns the entrance to this house in Paris, creating a welcoming atmosphere right from the first step. A hummingbird is captured in flight, surrounded by flowers that create a natural setting. The staircase itself seems to blend into the path of an imaginary garden, guiding visitors to the upper floor and inviting them to follow the hummingbird as it flies off to new horizons.

Tandem Saveurs Nomades

*Fusion
Restaurant
in Paris*

The blue of the sea, the green of the forests, the warmth of the wood and the gold of the plants in the tropical sunsets. This is how the interior design project for the tandem restaurant came about, an aesthetic contamination rooted in the gastronomic fusion cuisine offered by Thierry Marx's former sous-chefs, Cédric and William. The customer's visual experience begins with the minimalist gold-coloured sterilisations that accompany the eye through the first part of the restaurant; it then continues in the central corridor with the same tropical motifs and culminates in the large dining room, with a blue forest that harmonises the colours of the walls, creating a chromatic continuum.

Baciami

Sicilian restaurant in Paris

In sul calar del sole...

Loft in the center of Milan

The living room of this freshly renovated flat in Milan has been transformed thanks to this decoration that begins at dawn and ends at sunset. The walls come together in a chromatic embrace, with warm, luminous colours at the start, gradually evolving into cool, darker hues. But this decoration is much more than just a painting; it's a tribute to the family who live here. Their initials are hidden among the leaves and the little birds dancing on the wall are the canaries their grandmother loved so much. The title of this work is "In sul calar del sole... là dove si perde il giorno", an extract from a poem by Leopardi that perfectly captures the magical atmosphere of this stay. The owners were a constant source of inspiration, helping to make this project unique and tailor-made for them.

A walk around Paris

Siamo, Real Estate in Paris

Created in the Siamo Immobilier agency, this mural offers a unique vision of an imaginary Paris. Against a dark background, a delicate cream shade comes to life, sketching the Arc de Triomphe, the majestic Eiffel Tower and the charming Château de Vincennes. Each meticulous detail creates an immersive fresco, reminiscent of an architect's sketch. This work, the fruit of collaboration with the agency and Jean Louis, transforms the space into a visual escapade, an artistic tribute to the timeless beauty of Paris.

in Paris*

La Focacceria dei Sani

*An exceptional visual experience nestled
in the historic centre of Pisa*

A trompe-l'oeil transforms the great hall of this Renaissance structure into a pictorial escapade through the Tuscan countryside. The illusion of an extension of space, an imaginary walk through olive groves and vineyards in the bright Tuscan sunshine, with the hills and charming typical houses as a backdrop. A unique atmosphere that fuses the history of this establishment with a modern, artistic vision. Every detail has been designed to capture the very essence of the Tuscan countryside, offering guests at Focacceria dei Sani an immersive experience.

in Tuscany
A view from the hills

Scanditours Celtic Tours

*Travel agency
specialising in
Scandinavian
countries*

An Icelandic landscape at night, in the middle of the northern lights, with little wooden houses, trees and snow-capped mountains. A perspective that accompanies the gaze, imagining the continuity of the locals in a Nordic landscape immersed in nature.

Rastelli Design Show-room
